Profile

MSc in Physics with professional experience in data analysis, data processing, and process automation in the energy sector. Experienced in developing and maintaining Python pipelines for processing large datasets, handling up to approximately 8.5 million records, and automating reporting activities using Python, Excel, and Power BI. Master's thesis focused on hyperspectral image analysis and classification using Machine Learning algorithms. Analytical and problem-solving oriented, with the ability to translate operational and business requirements into technical solutions. Willing to relocate.

Professional Experience

- 09/2025 – **Technician - Transmission, Storage, LNG Contracts & Origination**, *Snam S.p.A.*, Milan
Present Development and maintenance of Python pipelines for the processing and transformation of large volumes of data related to gas transport and allocation, up to approximately 8.5 million records. Automation of previously manual data processing and reporting tasks using Python, Excel, and Power BI, reducing processing time and errors. Management and organization of tasks for the commercial department and direct client support on requests related to transport, storage, and LNG contracts.
- 2022 – 2025 **Mathematics and Physics Teacher**, *Various institutions*, Vigevano, Pavia, Opera
Design of teaching activities using digital tools. Development of communication, organizational, and independent task-management skills in complex settings.
- 06/2024 – **Software Developer**, *Sant'Ambrogio Servizi Industriali Srl*, Milan (MI)
07/2024 Software development in C# and introduction to design patterns, testing, and object-oriented programming (OOP) concepts.

Technical Skills

- Data Analysis Python (Pandas, NumPy), advanced Excel, Power BI, data processing, process automation
Database SQL
Programming Python, C#, MATLAB, JavaScript, HTML/CSS
Machine Learning SVM, Random Forest, Neural Networks, KNN, unsupervised models, multivariate analysis
Tools Git, LaTeX, debugging, PowerPoint, AI-assisted development

Education

- 2021 – 2024 **M.Sc. in Physics of Matter**, *Università degli Studi di Milano-Bicocca*, Milan (MI)
Grade: 110/110 — Thesis: *Hyperspectral image analysis for plant disease identification* — Multivariate analysis and machine learning project implemented in MATLAB.
- 2017 – 2021 **B.Sc. in Physics**, *Università degli Studi di Pavia*, Pavia (PV)

Soft Skills

- Skills Problem solving, critical thinking, communication, teamwork, organization and priority management
Languages Italian (native), English (B2)

Hobbies and Interests

- Interests Tabletop role-playing games (Dungeons & Dragons), woodworking, hobbyist software development
